

DIRECTIONS

Seed Crops: Initially apply 600 pounds of dry HumaGrow NSCTM per acre. For additional applications, use 150 pounds per acre. Spread HumaGrow NSCTM 4 to 6 weeks before planting and immediately after harvest and water in.

Fruit and Pecan Trees: Initially apply 400 pounds per acre equivalent with concentration of HumaGrow NSCTM in and around the trees drip zone. For additional applications, use 150 pounds per acre with concentration of HumaGrow NSCTM in and around the tree drip zone 2 to 4 times per year.

Planting Trees: When planting trees, place root ball in the hole and blend in back fill around the root ball with 2 pounds of HumaGrow NSCTM per 1" diameter of the root ball and place into hole. Spread 50 pounds directly in and around the base of the tree and then thoroughly soak root area.

Grasses: Initially apply 500 pounds of HumaGrow NSCTM per acre. For additional applications, use 100 pounds per acre. Spread initial application during dormant season with additional applications 2 to 4 times per year.

NOTE: For best results, when using HumaGrow NSCTM for the first time in an overall fertilization program, add HumaGrow NSCTM at a rate of 2 pounds per unit of dry fertilizer. After the first application reduce the amount of HumaGrow NSCTM to ½ pound per unit of dry fertilizer. Avoid applying excess fertilizers to soils or plant surfaces. The frequency of application and the amount of plant foods can be reduced because HumaGrow NSCTM activates the soil and root system and allows the plant to absorb nutrients more efficiently.

For Use with Broadcast Spreaders

HumaGrow NSCTM

0-0-0 Natural Soil Conditioner Dry Bulk Humate

ACTIVE INGREDIENTS:
Humate Substance 100%

- **Builds** a stronger root system by increasing root respiration and root formation.
- **Improves** and optimizes the uptake of nutrients and water by plants.
- **Great source** of energy for beneficial soil organisms, which influence both soil fertility and plant health.
- **Improves** aeration of soil and water retention in heavy and compact soils.
- **Prevents** water and nutrient losses in light sandy soils.
- **Healthier** roots hold soil in place, minimizing erosions.

ABOUT HUMAGROW

HumaGrow NSCTM is a dry natural soil conditioner and amendment which is beneficial to the physical, chemical, and biological properties of the soil, enhancing root quality. Vital for soil fertility and plant nutrition HumaGrow NSCTM adds humin, humic acids and fulvic acids to the soil. It gives the soil proper structure, improves porosity and water holding capacity, cation and anion exchange. HumaGrow NSCTM provides a good source of energy and mineral requirements for beneficial soil organisms. Regular use decreases the need for extensive fertilizing and reduces ground water pollution.

CAUTION

Keep out of reach of children. Do not store with food, feed or other material to be used or consumed by humans or animals. Harmful if swallowed. Avoid contact with eyes. This product may cause severe eye irritation. Flush eyes with water for 15 minutes, holding eyelids open. Obtain medical attention if irritation develops. This material must be disposed of according to Federal, State, or Local procedures under the resource conservation and recovery act.

No warranties are implied or expressed. Buyer assumes all responsibility for proper use of this product. For the agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist or write to Manufacturer.
